$\mathcal{F}, \mathcal{H}$ are ρ-interleaving $\Rightarrow W_\infty(\mathrm{Dgm}(\mathcal{F}), \mathrm{Dgm}(\mathcal{H})) \leq \rho$

$\ldots \Rightarrow W_\infty(\mathrm{Dgm}(\mathcal{F}), \mathrm{Dgm}(\mathcal{G})) \leq 2\rho.$

$\rho = t\sqrt{n}$

THM. Solid body $\mathbb{M} \subseteq \mathbb{R}^n$, $1/\kappa_{max} \geq 3tn$, reach $> 2t\sqrt{n}$, C finite.

Then $|V_1(\mathbb{M}) - V_1(\mathbb{M}_t, 4t\sqrt{n})| \leq c_{n-1,n} \cdot 4t\sqrt{n} \cdot C.$
